

## OUR MISSION

Double Dogwood Restoration Nursery is located along the west slope of the Sierra Nevada Mountains. Our stock of native riparian trees and shrubs, hardwoods and conifers are available for restoration and reforestation efforts.

From carbon sequestration to enhancement of biodiversity and climate resiliency - native plants and trees offer numerous benefits to both the ecosystem and human communities.

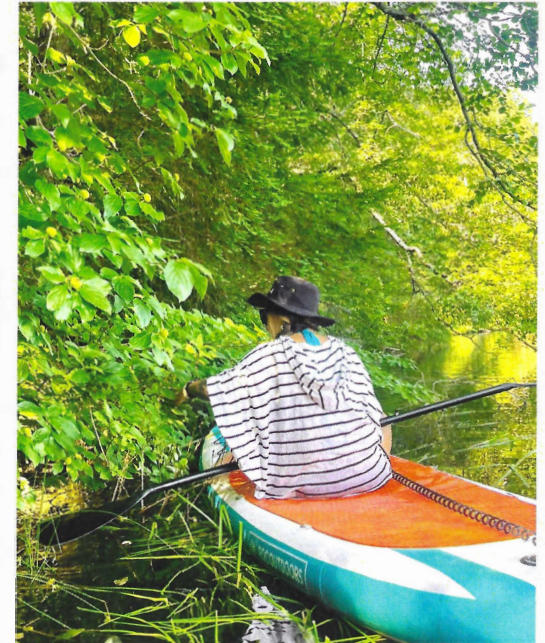

Our Nursery Team combines over 35 years of Native Plant Restoration, Design and Ecosystem Enhancement.

## PROPAGATION

Double Dogwood is an expert in propagating native species. We offer sales contracts or consigned grows ranging from 20 - 2,000 plants.

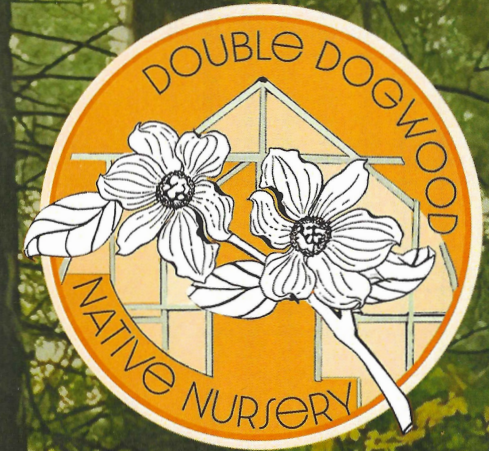

We also offer seed collection for custom orders.

You can see our current inventory availability and learn more about us at:
